Responsible for your hearing

To avoid hearing loss, turn down the volume of the music player before wearing headset. After putting on the headset, slowly adjust the volume to a suitable level. The unit of measurement for noise is (db). Long-term exposure to 85db or higher noise environment may cause hearing loss gradually. Monitor usage; hearing loss is the result of too much noise and time. The louder the sound, the more time to reduce exposure to noise. The softer the voice, the longer you can listen. Please visit the Consumer Electronics Association website (www.ce.org) to learn how to establish a safe listening level and review other important safety guidelines. For important information on how to prevent noise-induced hearing loss (NIHL) and a complete list of what noise can cause hearing loss, please refer to the website of the Foundation for the Study of the Hearing Impairment: www.drf.org.

Battery usage note

- There is an explosion risk if the battery is not replaced properly. Batteries can only be replaced with batteries of the same type or equivalent. It is not recommended to replace the battery without permission, but it can be returned to the manufacturer for replacement.
- The cell [battery pack or battery pack and] shall not be exposed to conditions such as sunlight, fire or similar overheating.

LIMITED WARRANTY

BUGANi products will furnish a replacement or repair any part which proves (upon inspection by BUGANi) to be defective under normal use within 12 months of the original purchase date. This warranty does not apply to appearance items, or accessories in the human damage caused by leaking batteries. it also does not apply to the product, or to any part thereof, that has been damaged through misuse or negligence, improper installation, or operation. Furthermore, this warranty will become invalid, in the judgment of BUGANi products or any parts installed incorrectly, repaired or altered by other than BUGANi Service department. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages or limitation incidental or consequential damages or limitations on how long an implied warranty lasts, so the above exclusions and limitations may not apply to you.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
